LevelMaster

This capacitive sensor is designed for the level control of bulk materials, liquids and pastes dielectric constant (DC) ϵ_r of 1,1. This sensor is a classic capacitive sensor that reliably detects all kind of materials. Capacitive sensors help to control the level in dosing systems, storage container or prevent the pump for dry running. For product that are high conductive and adhesive we recommend the models of the KS-801-... series.

The material to detect could be bulk material, such as, metal powder, plastic powder, granules, spices, dried herbs, coffee, sugar, cocoa, tabled powder liquids could be for instance, oil, milk products or juice.

EasyTeach

It could not be easier.
The user mounts the sensor, makes the electrical connection and the adjustment by means of the teach wire and the sensor is ready for use.

No additional teach equipment necessary.

Optical guidance during the teach process with the aid of a LED:
• standby • teach process • switching state

When the sensor is mounted with our adapters: welding socket or the process adapter Varivent N DN 50 a hygienic, EHEDG conforming process connection will be achieved.
